# Cable Modem Set Up Guide

I   II   III   IV
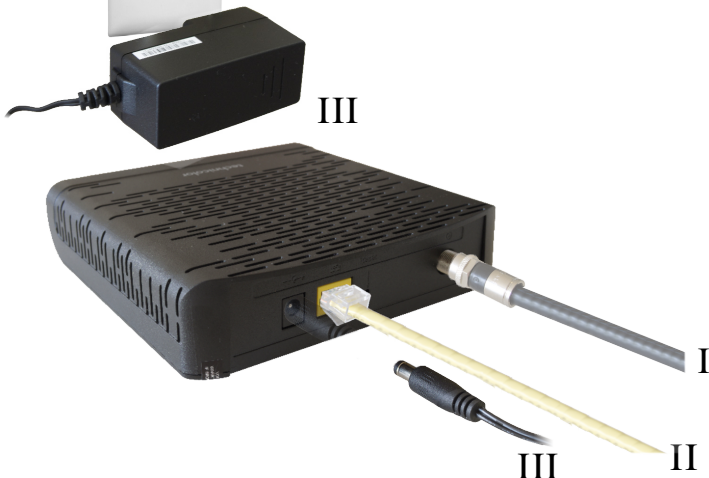

Follow the steps below for proper installation:

1 Connect the coaxial cable (I) to the **CABLE** connector on the modem (IV) and the other end into the cable wall outlet.

I

Note: To speed up the registration process of cable modem, the coaxial cable should be connected to the modem prior to the power connector.

2 Connect the RJ-45 Ethernet cable (II) to the yellow **ETHERNET** connector outlet on the modem, and the other end with the Ethernet port on your computer.

I

II

3 Plug the power adapter (III) into the **POWER** connector of the modem and plug the other end into a power outlet.

III

IV

I

III   II

4

The cable modem is ready for data transfer after the LED "LINK" light solid green.

Note: The RESET button at the rear panel is for maintenance purpose only. You don't need to use it.
